## **FINAL REJECTION**

### ***Response to Applicant's Amendment***

The rejections over Taguchi (US 6,225, 855), Okamura (US 5,712,536) and Akira (JP41120504) were withdrawn in view of the amendments to the claims..

### ***Claim Rejections***

#### ***Claim Rejections - 35 USC § 112***

Claims 1-5 and 7-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Correction or clarification is required.

In claim 1, it is unclear what the “maximum voltage drop across a gate oxide” and “gate oxide” are, how the maximum voltage can be dropped on the gate oxide and can not exceed a difference of the supply voltages, and how this limitation is read on the preferred embodiment or determined on the drawings. The same is true for claim 11 and 18-19.

The remaining claims are dependent from the above rejected claims and therefore also considered indefinite.

#### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2816

Claims 1-5, 7-18 and 20 are rejected under 35 USC 103 (a) as being unpatentable over Lien (US 6,441,651) or Ito et al (US Pat. US 5,218,247).

Figure 7 of Lien or Figure 3 of Ito et al and Figure 3 of Ito et al discloses a source follower circuit but does not disclose that the maximum voltage drop across the gate oxide of the transistor does not exceed a difference between the first supply voltage and the second supply voltage. However, as shown on column 5, lines 25-30, in the Lien reference the gate oxide is equal to the difference between the input voltage  $V_{in}$  and the output voltage  $V_{out}$ , and the thickness of the gate oxide of the transistor can be selectable. Thus, selecting the thickness of the gate oxide or the values of the supply voltage, the input voltage and the resistance for accommodating with a particular application is considered to be a common practice for an engineer or to be a matter of the design expedient. It would have been obvious to a person having skill in the art at the time the invention was made to select the values of the input voltage or the values of the components in the circuits of Lien and Ito et al for the purpose of accommodating with the particular application.

### ***Allowable Subject Matter***

Claim 19 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The claim would be allowable because the prior art does not disclose the multiplexer.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
